CITRIC ACID

BWCA

BASIC CHARACTERISTICS

- Citric acid is a key intermediate in metabolism.
- It is an acid compound found in citrus fruits.
- Citric acid can be used as anticoagulants due to their calcium chelating ability.
- Low pH 2.
- White Crystalline granules.

APPLICATION

- Water treatment Industry to balance or low pH, Antiscalent, Anticoagulant Membrane Chemicals.
- It is used in the food processing industries.
- Used in beverages industries.
- Used in Pharmaceutical industries.

SPECIFICATIONS

Appearance	Clear pale yellow color liquid
pH @ 30°C	2
Active content	100% as powder
Solvent Solubility	Completely soluble in water

DOSAGE

The Doses differs application to application for various industries.

Please take help of our technical team to calculate the doses as per your application.

STORAGE

Citric Acid should be stored in tightly-sealed original containers in a cool, dry and shaded place.
