SODIUM HYPOCHLORITE

NaOCl

BASIC CHARACTERISTICS

- Sodium hypochlorite is an oxidising agent.
- It can be used as disinfectant in water treatment systems.
- Pale, yellowish colour liquid with pungent smell.

APPLICATION

- Water treatment Industry as oxidising agent and disinfectant.
- It can be used to remove mold stains.
- Household bleach is, in general, a solution containing 3–8% sodium hypochlorite.
- Sodium hypochlorite solutions have been used to treat dilute cyanide waste water, such as electroplating wastes.

SPECIFICATIONS

Appearance	Clear pale yellow color liquid
pH @ 30°C	10 – 12
Specific Gravity	1.11
Active content	14 – 20% as Liquid
Solvent Solubility	Completely soluble in water

DOSAGE

The Doses differs application to application for various industries.

Please take help of our technical team to calculate the doses as per your application.

STORAGE

Sodium Hypochlorite should be stored in tightly-sealed original containers in a cool, dry and shaded place
