

BASIC CHARACTERISTICS

- Sodium metabisulphite is an anti-oxidising agent.
- It can be used as anti-chlorine in water treatment systems.
- White Crystalline powder.

APPLICATION

- Water treatment Industry for de-chlorination.
- It is used as a preservative and antioxidant in food.
- It is commonly used in home brewing and winemaking to sanitize equipment.
- It is used as a cleaning agent for potable water reverse osmosis membranes in desalination systems.

SPECIFICATIONS

Appearance	Clear pale yellow color liquid
pH @ 30°C	2
Active content	100% as powder
Solvent Solubility	Completely soluble in water

DOSAGE

The Doses differs application to application for various industries.
Please take help of our technical team to calculate the doses as per your application

STORAGE

Sodium Metabisulphite should be stored in tightly-sealed original containers in a cool, dry and shaded place.
